Deposits can be paid by credit card or check.

Ecoshel Ships Worldwide. Ecoshel ships directly to the job site in cartons on pallets, delivered to the ground. Shipping is discounted on direct sales. Minimum order for US delivery is 4 squares (400 sq. ft.).

Architectural CVG #1-A: 100% Select Clear Vertical Grain. The highest quality WRC shingle available. Provides the highest level of dimensional stability and decay resistance. Recommended for roofing, and for siding that is finished with lighter colored semi-transparent stains that allow the variations in wood tones to show through.

Standard FG #2 includes flat and vertical grain shingles. Shingles may include knots or defects only in the upper unexposed portion of the shingle. The stronger grain pattern is recommended for siding that is finished with a solid color stain, where an authentic wood grain texture is preferred.

Rustic FG includes flat and vertical grain shingles that may include knots or defects in the exposed shingle area.

All Ecoshel shingles are rejointed and rebuted (R&R), kiln dried, and sanded. They also include the built-in ventilated rain-screen, eliminating the expense of installing a separate rain-screen product. Ecoshel installs much faster than conventional shingle installation, resulting in a lower installed cost.

Cost per Square (100 sq. ft.)

Exposure ▶	7-1/2"	7"	6-1/2"	6"	5-1/2"
Architectural CVG #1-A Unfinished	\$434	\$462	\$497	\$542	\$585
